The Rise of Populism

Be It Resolved, the future of western politics is populist not liberal....

Throughout the Western world, politics is undergoing a sea-change. Long-held notions of the role of government, trade and economic policy, foreign policy and immigration are being challenged by populist thinkers and movements. Does this surging populist agenda in Western nations signal a permanent shift in our politics? Will our politics continue to be shaped by the post-war consensus on trade, inclusive national identity and globalization, or by the agenda of insurgent populist politics, parties and leaders?
